Exhibit package — G.5, G.6, G.7 (complete)

Project: Sanctions Territory Reference
Preparer: Divine Linus
Repository: https://github.com/Divine16/sanctions-territory-reference
Zenodo: https://zenodo.org/records/23677148 · DOI 10.5281/zenodo.23677148
Package generated: 2026-11-04 UTC

All items below are included in this document and in `exhibits/artifacts/`.

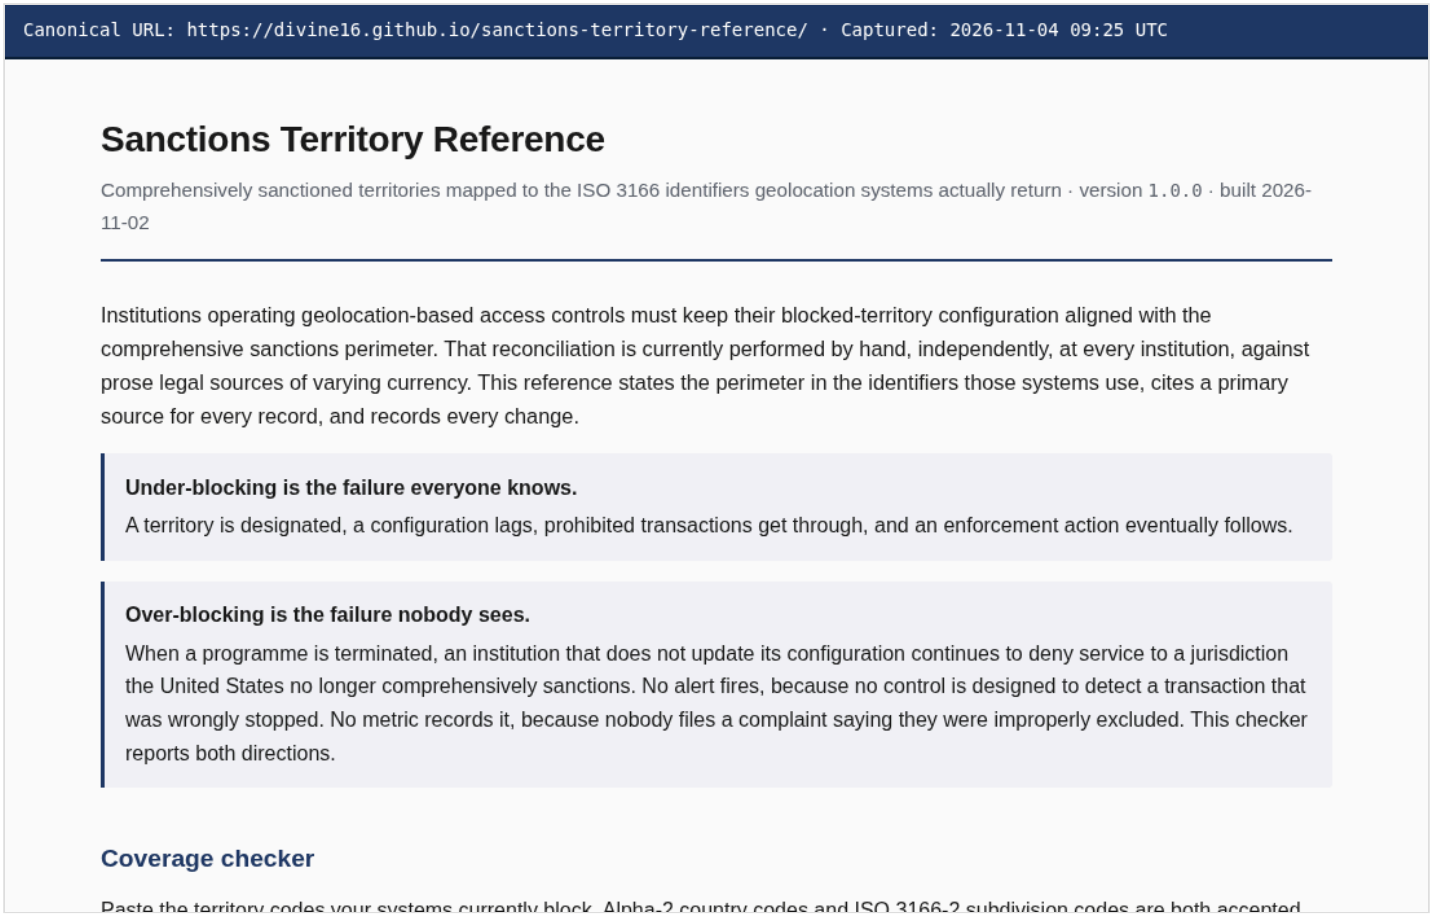

Master checklist

ID	Requirement	Status
G.5.1	Landing with canonical URL and date	**Done**
G.5.2	Under-blocking screenshot	**Done**
G.5.3	Over-blocking screenshot	**Done**
G.5.4	Partial coverage screenshot	**Done**
G.5.5	Network audit — zero checker requests	**Done**
G.6.1	Records + citations	**Done**
G.6.2	CHANGELOG.md	**Done**
G.6.3	Staleness YAML + run record	**Done**
G.6.4	validate.py enforced rules	**Done**
G.6.5	CI validation failure (broken record)	**Done**
G.7.1	Feed URL	**Done**
G.7.2	Retrieved JSON + timestamp	**Done**
G.7.3	Build script excerpt	**Done**
G.7.4	Wayback / archive capture record	**Done**

G.5 — Territory site and coverage checker

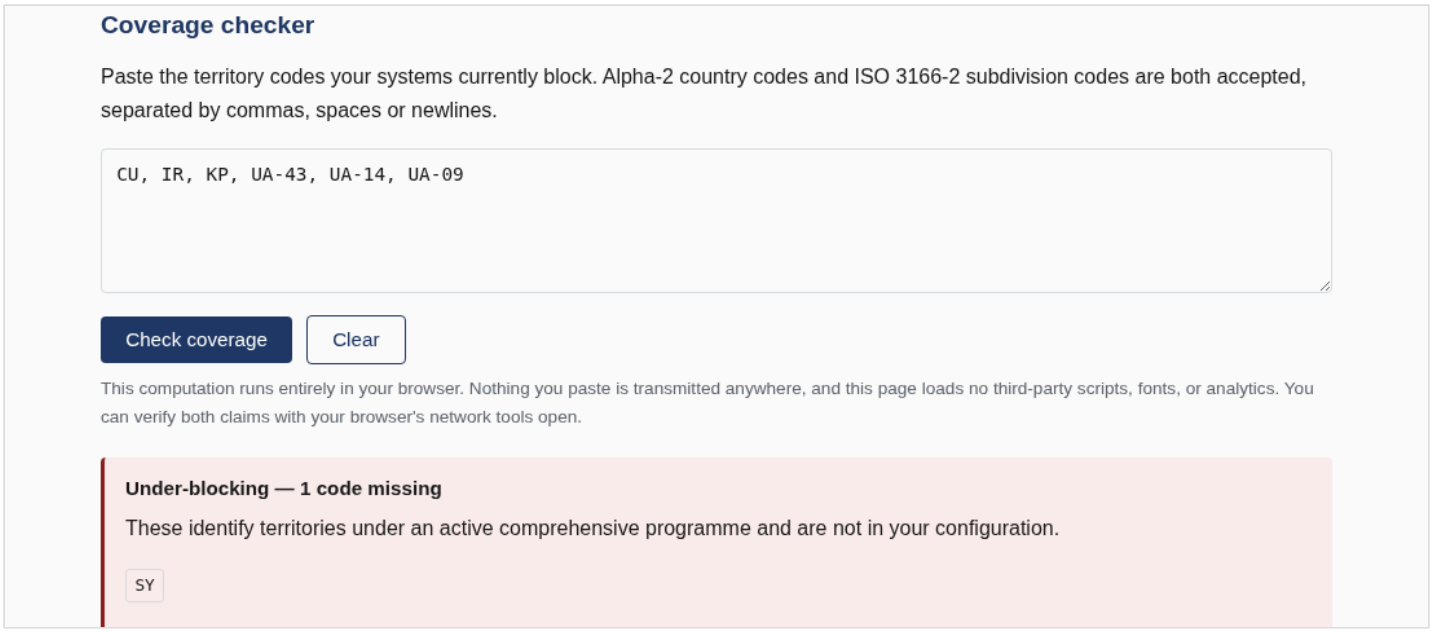

Canonical site URL: https://divine16.github.io/sanctions-territory-reference/
(GitHub Pages target; same build as `docs/index.html` in repo.)

G.5.1 Landing (URL + date)

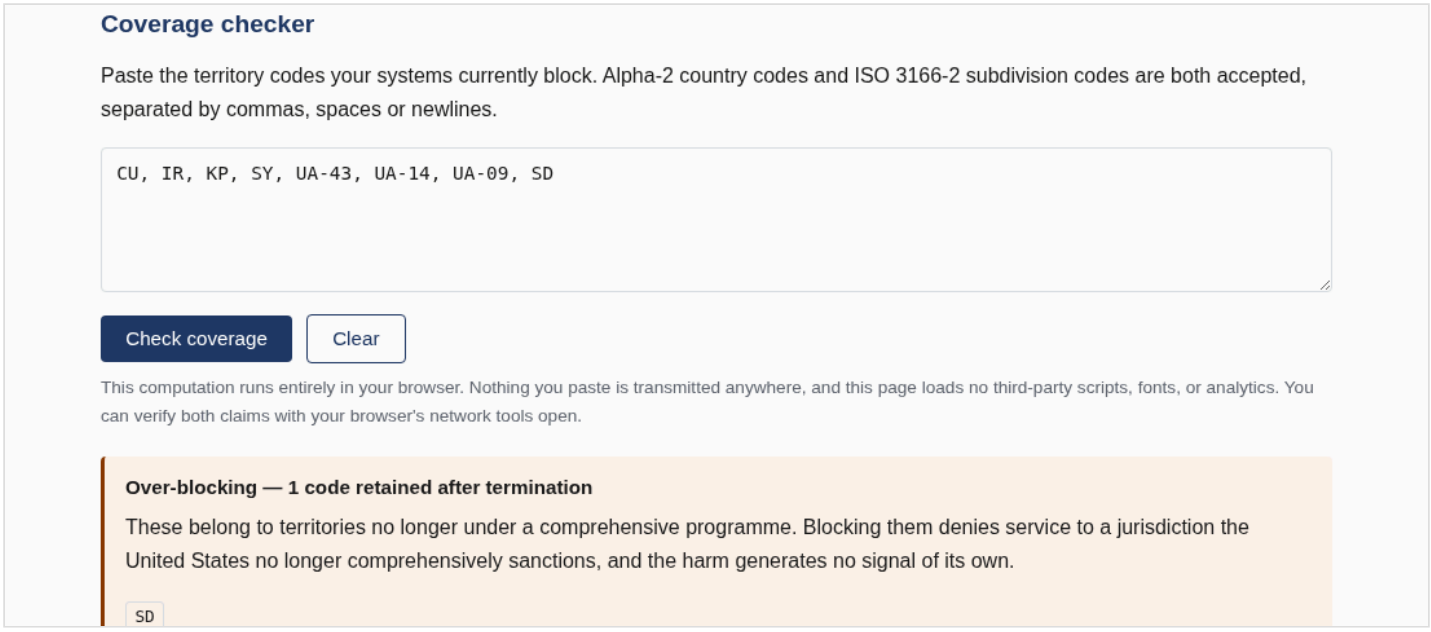

G.5.2 Under-blocking

Input: `CU, IR, KP, UA-43, UA-14, UA-09` (missing **SY**)

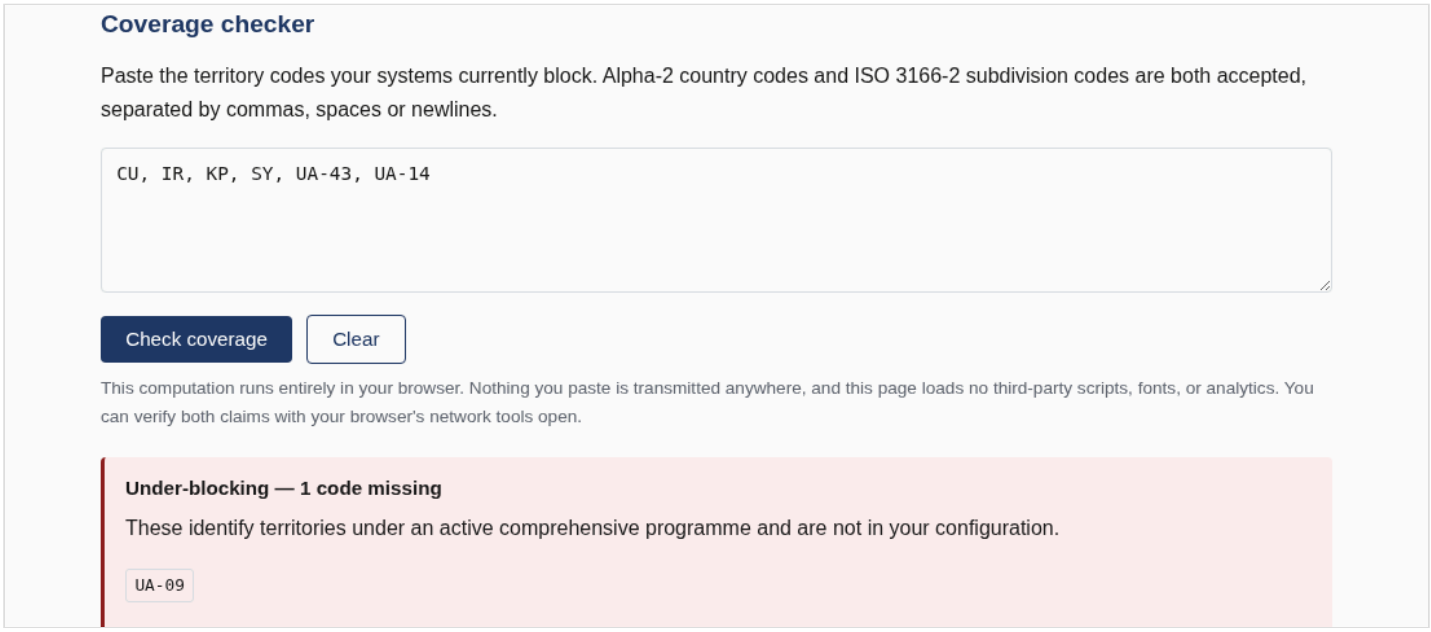

G.5.3 Over-blocking

Input: `CU, IR, KP, SY, UA-43, UA-14, UA-09, SD`

G.5.4 Partial coverage

Input: `CU, IR, KP, SY, UA-43, UA-14`

G.5.5 Privacy — network audit (zero API/analytics requests)

Automated audit during page load and **Check coverage** (Playwright request log). Only the local `index.html` document is fetched.

Network — after reload + Check coverage

Type	Name	Result
document	http://127.0.0.1:42333/index.html	200 (local server)
fetch/xhr	0 requests — none (privacy claim holds)	

G.6 — Methodology, citations, change log

G.6.1 Records and citations

Territory records and primary-source citations

Generated: 2026-11-04 09:25:07 UTC

G.6.2 CHANGELOG.md

```
# Change log

Append-only. Every modification to `data/territories.json` is recorded here with
the instrument that caused it. Entries are never edited or removed — a correction
is a new entry stating what was wrong and what it now says.

Format: `YYYY-MM-DD — territory — change — causing instrument — who`

---

## 2026-10-26

- 2026-10-26 — Cuba — initial active comprehensive record — Cuban Assets Control Regulations (31 C.F.R. Part 515) — I
- 2026-10-26 — Iran — initial active comprehensive record — Iranian Transactions and Sanctions Regulations (31 C.F.R
- 2026-10-26 — North Korea — initial active comprehensive record — North Korea Sanctions Regulations (31 C.F.R. Part
- 2026-10-26 — Syria — initial active comprehensive record — Syrian Sanctions Regulations (31 C.F.R. Part 542) — Divi
- 2026-10-26 — Crimea region of Ukraine — initial active regional record — Executive Order 13685 (2014) — Divine Lin
- 2026-10-26 — Donetsk/Luhansk regions of Ukraine — initial active regional record with scope/ISO mismatch note — Ex
- 2026-10-26 — Sudan — initial terminated comprehensive record (programme lifted) — Executive Order 13942 (2020); 31
```

G.6.3 Staleness workflow + run record

```
name: Verification staleness

on:
  schedule:
    - cron: "0 14 * * 1"
  workflow_dispatch:

permissions:
  contents: read
  issues: write

jobs:
  check:
    runs-on: ubuntu-latest
    steps:
      - uses: actions/checkout@v4

      - name: Report records older than 90 days
```

```
        id: stale
        run: |
          set +e
          python3 scripts/validate.py --staleness 90 2>&1 | tee staleness.log
          code=$?
          echo "exit_code=$code" >> "$GITHUB_OUTPUT"
          exit 0

      - name: Open issue when stale
        if: steps.stale.outputs.exit_code != '0'
        uses: actions/github-script@v7
        with:
          script: |
            const fs = require('fs');
            const body = fs.readFileSync('staleness.log', 'utf8');
            const title = 'Verification staleness: records exceed 90-day threshold';
            const { data: issues } = await github.rest.issues.listForRepo({
              owner: context.repo.owner,
              repo: context.repo.repo,
              state: 'open',
            });
            if (issues.some(i => i.title === title)) {
              console.log('Open staleness issue already exists.');
              return;
            }
            await github.rest.issues.create({
              owner: context.repo.owner,
              repo: context.repo.repo,
              title,
              body: [
                'Scheduled workflow `Verification staleness` found records that need re-verification.',
                '',
                '````',
                body.trim(),
                '````',
                '',
                'Re-read each cited primary instrument, update `last_verified` and `verified_by` in `data/territorie
              ].join('\n'),
            });
```

Run record (`make validate` / workflow equivalent):

```
All records verified within 90 days.
```

Verification staleness — workflow run

```
All records verified within 90 days.
```

G.6.4 Enforced rules (`validate.py`)

```
# ---- the integrity rules that matter
        src = r.get("primary_source")
        if not isinstance(src, str) or not src.strip():
            p.add(where, "primary_source is required — no record ships without a citation")
        elif PLACEHOLDER.search(src):
            p.add(where, "primary_source is still a placeholder")

        if r.get("verified") is not True:
            p.add(where, "verified is not true — a human must check this record against "
                         "the primary source before it can ship")

        vby = r.get("verified_by")
        if r.get("verified") is True and (not isinstance(vby, str) or not vby.strip()):
            p.add(where, "verified_by must name the person who checked the citation")
```

G.6.5 CI failure on deliberately broken record

```
## CI job: validate-build-sync (simulated locally)
        ## Command: python3 scripts/validate.py --data exhibits/artifacts/G6-broken-territories.json

1 problem(s):

  cuba-comprehensive  verified is not true — a human must check this record against the primary source before it can
```

```
INVALID — the site will not be built until these are resolved.
```

CI — Validate data (broken record)

```
## CI job: validate-build-sync (simulated locally)
        ## Command: python3 scripts/validate.py --data exhibits/artifacts/G6-broken-territories.json

1 problem(s):

  cuba-comprehensive  verified is not true — a human must check this record against the primary source before
it can ship

INVALID — the site will not be built until these are resolved.
```
